

ID	User Stories & Associated Tasks	Estimates	ASSIGNED TO	STATUS
<b>1</b>	<b>As an AWS DevOps engineer, create a new AWS Account and infrastructure in order to host the Proof-of-Concept</b>	<b>0.5</b>		<b>Complete</b>
1.1	Leverage AWS Lightsail to provision the environment with a Bitnami LAMP Stack (2 GB Memory, 1 Core Processor, 60 GB SSD Disk, 3 TB Transfer)	0.5	AWS Engineering	Complete
1.2	Provide access to the new AWS account so the Drupal developer can install a new Drupal 8 instance.	0	AWS Engineering	Complete
<b>2</b>	<b>As a Drupal developer, I need to install and perform initial configurations to develop a proof of concept decoupled multi-language Drupal solution.</b>	<b>2</b>		<b>Complete</b>
2.1	Install default Drupal platform on AWS	0.5	Drupal Team	Complete
2.2	Configure custom and contributed modules necessary to do development	0	Drupal Team	Complete
2.3	Devel: Various blocks, pages, and functions for developers.	0.5	Drupal Team	Complete
2.4	Hooks Reaction: A custom module that allows developers to group minor scripts that don't necessarily need their own module into subcategories (reactions).	1	Drupal Team	Complete
<b>3</b>	<b>As a Drupal developer, I need to create a solution to solve a RESTful API to decouple the CMS from the presentation layer</b>	<b>7</b>		<b>Complete</b>
3.1	Configure Drupal Core Modules: HAL- Serializes entities using Hypertext Application Language. (This module is required by the Serialization module.)	0.25	Drupal Team	Complete
3.2	Configure Drupal Core Modules: HTTP Basic Authentication- Provides the HTTP Basic authentication provider.	0.25	Drupal Team	Complete
3.3	Configure Drupal Core Modules: RESTful web services- Exposes entities and other resources as RESTful web API	0.25	Drupal Team	Complete
3.4	Configure Drupal Core Modules: Serialization- Provides a service for (de)serializing data to/from formats such as JSON and XML	0.25	Drupal Team	Complete
3.5	Create Drupal Views for RESTful API	1.5	Drupal Team	Complete
3.6	Setup the Views-API to lookup the appropriate content-item based on the [breadcrumb]-URL	4.5	Drupal Team	Complete
<b>4</b>	<b>As a Drupal developer, I need to create a solution to solve the problem of presenting the content in both English and Spanish</b>	<b>4</b>		<b>Complete</b>
4.1	Configure contributed modules: Field Group: Provides the ability to group your fields on both form and display.	0	Drupal Team	Complete
4.2	Create custom reaction: Translation Reaction: Facilitates the auto-population of Spanish text on save when English is entered into a blank English Field	3.5	Drupal Team	Complete
4.3	Create content type with field groups for both English and Spanish data.	0.5	Drupal Team	Complete
<b>5</b>	<b>As a Drupal developer, I need to create a identical English and Spanish fields based on the sample VA pension eligibility site template, so that creating and editing content is intuitive</b>	<b>1</b>		<b>Complete</b>
5.1	Leverage the current VA site template to create a content type with 5 main fields to be translated: Page Title, Headline, Blue Box, Content Area, & Gray Box	1	Drupal Team	Complete
<b>6</b>	<b>As a UI/UX Engineer, I need to design a CMS Workflow based on a Human-Centered Design principles</b>	<b>29</b>		<b>Complete</b>
6.1	Design and create personas for each role	3	UI / UX Team	Complete
6.2	Create a workflow diagram as a design artifact for the developers	12	UI / UX Team	Complete
6.3	Conduct user testing with CTAC content publishers and consolidate feedback in a report	8	UI / UX Team	Complete
6.4	Create different statuses for creation, editing, translation, and publishing/unpublishing of content through the CMS	3	UI / UX Team	Complete
6.5	UI Improvement based on Heuristic Principles : Solution a way for all editing and publishing actions to be easily accessed in one place.	3	UI / UX Team	Complete

ID	User Stories & Associated Tasks	Estimates	ASSIGNED TO	STATUS
<b>7</b>	<b>As a Drupal developer, I need to implement the UI/UX workflow solution, so that users can access, edit, and publish content based on their role and permissions.</b>	<b>11</b>		<b>Complete</b>
7.1	Configure Contributed Modules: Field Permissions: Set field-level permissions to create, update or view fields.	3	<i>Drupal Team</i>	<i>Complete</i>
7.2	Configure Contributed Modules: Entity Reference Revisions: Adds an Entity Reference field type with revision support.	3	<i>Drupal Team</i>	<i>Complete</i>
7.3	Create custom reactions: Revision Log Reaction: Tracks revisions within fields, will be leveraged for alerts	1	<i>Drupal Team</i>	<i>Complete</i>
7.4	Create custom reactions: Workflow Tab Reaction: Allows parts of a node to be published and other parts not to be published during the output of the node via the API	3	<i>Drupal Team</i>	<i>Complete</i>
7.5	Create Permissions/Roles: English Editor, Spanish Editor, Bilingual Editor, English Publisher, & Spanish Publisher	1	<i>Drupal Team</i>	<i>Complete</i>
<b>8</b>	<b>As a Drupal developer, I need to develop a solution to view and edit based on the hierarchical structure of the pages of the website</b>	<b>5</b>		<b>Complete</b>
8.1	Create custom reactions: Site Structure Tree Reaction: Allows the user to structure the content in a hierarchical List	5	<i>Drupal Team</i>	<i>Complete</i>
<b>9</b>	<b>As a Spanish editor, I need to translate the main landing page from English to Spanish to show the difference between manual translation and the automatic Google Translate feature.</b>	<b>2.5</b>		<b>Complete</b>
9.1	Translate the top level VA pension eligibility landing page	2	<i>Spanish Editor</i>	<i>Complete</i>
9.2	Ensure all child sites in the site tree have been automatically translated into Spanish by the Google Translate feature	0.5	<i>Spanish Editor</i>	<i>Complete</i>
<b>10</b>	<b>As a Drupal Developer, I need to spoof the ability to send emails, so that the proof-of-concept can demonstrate alerts, but will not spam or email individuals</b>	<b>1.5</b>		<b>Complete</b>
10.1	Create reaction (mini-module) to notice changes to content, identify what changes were made, and display an EMail-notification-popup	1.5	<i>Drupal Team</i>	<i>Complete</i>
<b>11</b>	<b>As the Business Analyst, I need to create a user guide for each of the roles within the proof-of-concept, so that reviewers can quickly understand the full functionality of the proof-of-concept</b>	<b>3</b>		<b>Complete</b>
11.1	Take screenshot of each step in the workflow for the Editor Role	0.5	<i>Business Analyst</i>	<i>Complete</i>
11.2	Take screenshot of each step in the workflow for the Publisher Role	0.5	<i>Business Analyst</i>	<i>Complete</i>
11.3	Create the User Guide with step by step directions according to the Workflow designed by the UI/UX team	2	<i>Business Analyst</i>	<i>Complete</i>
<b>12</b>	<b>As the Content Editor, I need to copy over the existing site structure, so that the proof-of-concept closely matches the production version</b>	<b>1</b>		<b>Complete</b>
12.1	Copy over the existing site structure under the eligibility section ( <a href="https://www.va.gov/pension/eligibility/">https://www.va.gov/pension/eligibility/</a> ) and it's first level of subpages	1	Content Editors	Complete
